SAKSHI SHINDE

Data Analyst

9967246429 | sakshishinde813@gmail.com

SUMMARY

Aspiring Data Analyst and B.Sc. CS graduate with strong knowledge of Python, SQL Skilled in data cleaning, exploratory data analysis (EDA), and data visualization using Pandas, Matplotlib, and Tableau. Experienced in building data-driven projects including a relational database system and interactive Tableau dashboards. Seeking an entry-level opportunity to analzse data and generate actionable insights for business decisions.

EDUCATION

- ***ICLES' Motilal Jhunjhunwala, College* (2022-2025)**

  Bachelor of Computer Science (2022-2025)

- ***ICLES' Motilal Jhunjhunwala, College***

  Higher Secondary Education **(2022)**

TECHNICAL SKILLS

- **Programming & Databases:** Python , SQL, MySQL
- **Data Analysis:** Data Cleaning, Exploratory Data Analysis (EDA)
- **Libraries:** Pandas, NumPy, Matplotlib, Seaborn
- **Other Tools:** PowerPoint, Word, VS Code
- **Visualization Tools:** Tableau, Power BI

PROJECTS

_Online voting system| MySQL

- Developed an Online Voting System using MySQL to manage elections, voters, candidates, and votes with a structured relational database.
- Built the project to ensure secure, accurate, and efficient voting, reducing manual errors and improving transparency.
- Utilized SQL (JOIN, GROUP BY, Aggregate Functions), Triggers, Stored Procedures, Views, Window Functions, and Event Scheduler.
- Delivered impact by preventing duplicate votes, enforcing validations, and enabling fast result analysis and reporting.

Fit-Track System |python

- Built a Health & Fitness System using Python (OOP) to calculate BMI and health status.
- Generated personalized diet and exercise plans based on user input.
- Implemented allergy filtering and preference-based recommendations.
- Automated health reports and notifications.
- Integrated features like membership plans and payment handling.

Breast Cancer Analysis| Power bi

- Built an interactive Breast Cancer Analysis Dashboard using Power BI to analyze 248 patient records
- Visualized survival trends, metastasis impact, and treatment responses using multiple charts
- Derived insights showing higher survival in early stages and increased risk with metastasis
- Improved data interpretation by converting raw data into actionable visual insights

CERTIFICATION

Google Data Analytics Professional Certificate – Coursera

Data Analytics (Pursuing) – Quastech Institute, Vashi | 2025–2026
